## PROFESSIONAL SUMMARY

Flutter developer with 6+ years of experience shipping production mobile apps, currently the sole developer behind Teton's entire consumer app lineup, ECG health monitoring, smart scales, a connected toy train, and a personal-safety app, all live on the App Store and Google Play. Comfortable taking a product from initial architecture through release independently, having worked across different state-management approaches (Riverpod, Provider, GetX) and hardware integrations (BLE, USB, Arduino) depending on what each app needed. Also holds a published paper in applied machine learning.

- 10+ production Flutter apps shipped solo, spanning health, fitness, gaming, and personal safety.
- Built hardware integrations over Bluetooth (Toy locomotives, Smart Scales) and USB (ECG devices) to connect proprietary devices to their companion apps.
- Shipped production apps for two clients in Japan, including a fully Japanese-localized ordering app for KEIAI.
- Published research in applied machine learning (IEM-ICDC 2020, India).

## CORE SKILLS

|                         |                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------|
| Languages               | Dart, Java, Kotlin, Swift, Python, C#                                               |
| Mobile Development      | Flutter (advanced), Native Android, iOS, Platform Channels, Custom Flutter SDKs     |
| State Management        | Riverpod, Provider, GetX, and other state management tools                          |
| Connectivity & Hardware | Bluetooth Low Energy (BLE), USB device integration, Arduino, IoT device integration |
| Backend & Data          | MongoDB, Firebase, REST APIs, MySQL, SQLite, Django                                 |
| Game Development        | Unity, Flame, PyGame                                                                |
| Tooling & Other         | Git, LaTeX, HTML/CSS/JavaScript, Localization/i18n, Microsoft Office                |

## PROFESSIONAL EXPERIENCE

### Team Lead | Teton Private Ltd.

October 2026 – Present

- Leads Teton's app development team, setting technical direction and mentoring the junior developers and engineers on the team.
- Main point of coordination between the app team and Teton's design, backend, and hardware teams on all app-related work.
- Maintains Teton's full app portfolio, shipping ongoing updates, fixes, and new features across the lineup.
- **Teton HR:** A dedicated mobile app for Teton's field sales team, enabling clock-in from outside the office with photo capture and GPS location verification. Features a live location tracker with heatmap visualization on an interactive map showing movement during tracked sessions, plus attendance record checking, dealer registration form and dealer list management, and an activities log, all integrated with Teton's main HRMS.

### Senior Software Engineer | Teton Private Ltd.

January 2025 – September 2026

- **Teton Health:** Companion app for Teton's ECG devices (Lead 2, Lead 6, Lead 12), connected via USB. Handles ECG PDF generation, downloading and sharing, subscription-based access, and broader health-metric tracking. Riverpod on the frontend, MongoDB on the backend.
- **Shara - Emergency SOS:** Personal-safety app that works two ways: offline, it sends an SMS-triggered SOS through a server; online, it alerts nearby volunteers (within a 2 km radius) and trusted contacts directly. Also includes a full chat system with multimedia sharing, built on GetX and MongoDB.

## Software Engineer II | Teton Private Ltd.

January 2023 – December 2024

- **Teton Fitness Scale:** Started as a Flutter SDK built for Android and iOS, later folded into the consumer app. Connects to Teton's smart bath scales over Bluetooth and surfaces body weight along with metrics like visceral fat, body water, and muscle mass. State managed with Provider, data stored in Firebase.
- Developed the **Teton Meal App**, a meal planning and ordering experience for Teton's consumer product line.

## Software Engineer I | Teton Private Ltd.

April 2021 – December 2022

- **Teton Train:** Built the BLE integration connecting the physical Teton Locomotive Set to the app for real-time device control. The game itself started in Unity, then got rebuilt into Flutter with multiple levels and scenarios; kids connect their physical train over Bluetooth to control both the toy and the in-app version at once.

*Also built and worked on numerous prototype apps for R&D purposes.*

## Mobile Application Engineer | XOR Geek

September 2020 – April 2021

- Fully localized the **KEIAI Order App** for the Japanese market (Japan-only App Store/Play Store release), covering product search, cart, and order history.
- Developed the **Classic Golf App** (Japan), integrating Zendesk chat SDK and Pushwoosh push notifications.

## Co-Founder & Developer | Hashtech360

January 2020 – September 2020

- Co-founded the venture and handled mobile development from idea to launch.

## OTHER PROJECTS

---

- **ChatApp:** A fast, high-end one-to-one chat app built on Firebase, real-time message delivery, an inbox that automatically resurfaces the most active conversations, and a clean, polished UI throughout.
- **Algorithm Visualizer:** Interactive tool visualizing sorting and search algorithms with adjustable speed controls.

## EDUCATION

---

### B.Sc. in Computer Science and Engineering | BRAC University

May 2015 – December 2019

CGPA: 3.52 / 4.00

### Higher Secondary Certificate | M.C. College, Sylhet

June 2011 – August 2013

GPA: 5.00 / 5.00

### Secondary School Certificate | Blue Bird School & College, Sylhet

January 2009 – March 2011

GPA: 5.00 / 5.00

## RESEARCH & PUBLICATIONS

---

- **Undergraduate Thesis:** Skin Cancer Detection Using Convolutional Neural Network Architectures.
- **Published Paper:** "Automated Soil Testing System using Colorimetry and Arduino", IEM-ICDC 2020, India.
